Data from Census Bureau Current Surveys

Current Population Survey

Survey of Income &
Program Participation

Current Population Survey (CPS)

Current Population Survey

- A monthly survey of 65,000 households conducted by the Census Bureau for the Bureau of Labor Statistics.
- Its primary task is to produce monthly statistics on unemployment and the labor force.
- It also serves as a vehicle for supplemental studies on subjects other than employment, such as marital status, birth history, tobacco use, and much more.

Current Population Survey Published Reports

- **P20 Population Characteristics**
 - Geographic residence and mobility
 - School enrollment
 - Marital Status and living arrangements
 - Households and families
 - Asian and Pacific Islander, Black and Hispanic populations
- **Issued every other year**
- **Reports & detailed tables available on the Census Bureau's internet site free of charge**

Current Population Survey Published Reports

P23 Special Studies

- Information on specialized data
- Family Life, Women, Voter Turnout, Computer Use, Profile of the Foreign-Born Population and other topics

P60 Consumer Income and Poverty

- Information concerning families, individuals, and households at various income levels
- Data are also presented on non-cash benefits and the relationship of income to age, sex, race, family size, education, occupation, work experience and other characteristics.

Current Population Reports

Survey Data

Current Population Survey

Much of the current population data is derived from the Current Population Survey (CPS), which is a sample household survey of the noninstitutional civilian population in the United States. Its primary task is to produce monthly statistics on unemployment and the labor force, which are published by the U.S. Bureau of Labor Statistics in its monthly bulletin *Employment and Earnings*. Much of the data collected is also available at the [CPS Internet Site](#).

The CPS also serves as a vehicle for supplemental studies on subjects other than employment, such as tobacco use and marital and birth history.

The data from CPS are available in reports and microdata files. From the basic and supplemental data, the Census Bureau issues three report series:

1. [P20, Population Characteristics](#)
Reports in this series contain information on geographic residence and mobility, school enrollment, marital status and living arrangements, households and families, and the Asian and Pacific Islander, Black, and Hispanic populations. These reports, many of which were issued every year, are now issued every-other-year. In the off year, detailed tables may be accessed online, free of charge, at the Census Bureau's [Internet Site](#).
2. [P23, Special Studies](#)
Information pertaining to methods, concepts, or specialized data is furnished in these publications. In addition, this series includes occasional reports on family life, women, voter turnout, computer use, and other topics.
3. [P60, Consumer Income and Poverty](#)
Information concerning families, individuals, and households at various income levels is presented in this group of reports. Data are also presented on noncash benefits and the relationship of income to age, sex, race, family size, education, occupation, work experience, and other characteristics. The letters "RD" for reports occasionally issued in this and other series refer to "research and development." Such reports use an experimental approach.

Table FINC-01. Selected Characteristics of Families, by Total Money Income in 2001

CAUTION: Whenever a base of an income distribution is relatively small, the medians, means, and percent distributions are extremely unreliable because of the limited size of the sample. Pay particular attention to the standard errors for small population estimates, especially if the base is less than 75,000.

Use a landscape setting and legal size paper to print these tables.

The survey's principal purpose is to provide estimates of money and in-kind income and participation in government programs. Recurrent questions focus on employment, types of income, and noncash benefits. Periodically, the survey also includes questions on other topics, such as assets and liability, disability, and child care. From time to time, special supplemental questions are also asked.

The data from SIPP are available in reports and microdata files. Much of the data collected is available at the [SIPP Internet Site](#). The report series is: **P70, Household Economic Studies**
